### 1. Executive Overview & Core System Architecture

TeleCorp ERP is engineered specifically for national mobile handset distributors, official brand dealers (Samsung, Xiaomi, Vivo, Realme, Apple), and multi-outlet retail chains operating in Bangladesh.

#### Key Technical Pillars:

- Unique IMEI & Serial Tracking:** Every handset is uniquely identified by its 15-digit primary IMEI ( `imei1` ), optional secondary IMEI ( `imei2` ), and battery/serial number. Handsets are never tracked as mere numeric quantities; stock exists as atomic serial records with full lifecycle history ( `In Stock` → `Sold` → `Customer Return` → `Supplier Return` ).
- Offline-First Reactive Engine:** Transactions complete in Oms locally in React State & IndexedDB/LocalStorage. A background sync worker ( `syncEngine.ts` ) packages updates into an idempotent queue and syncs to Supabase Cloud whenever connectivity is restored.

- **Bangladeshi Telecom Specifics:** Built-in BTRC official vs. unofficial network region tags, 5% standard VAT, BIN integration, Steadfast courier consignment generator, bKash/Nagad merchant payment references, and hire-purchase EMI amortization schedules.

## Section A: Complete Start-to-Finish Business Workflow

### Step 1: Initial System Setup & Company Profile

- **What to do:** Configure legal entity name, Trade License, VAT/BIN number, currency ( `BDT ট` ), default warehouse, valuation method ( `FIFO` ), and hard credit-block policies.
- **Why it is required:** Sets tax invoice print headers, legal receipts, and foundational calculation rules.
- **Menu to use:** `সেটিংস ও ব্যাকআপ হাব (SettingsView)` → *কোম্পানি প্রোফাইল ও কনফিগারেশন*.
- **Mandatory fields:** `companyName`, `companyPhone`, `defaultVatPercent`, `currency`, `valuationMethod`.
- **What to verify:** Check that VAT BIN number matches NBR registration and default valuation is set to `FIFO`.
- **What happens after saving:** All new printable invoices ( `SAL-xxxx`, `PINV-xxxx`, `MR-xxxx` ) immediately adopt these details.
- **What should NOT be changed:** Do not toggle `valuationMethod` between FIFO and Weighted Average mid-fiscal-year without accounting supervisor approval.
- **Authorized Roles:** `Super Admin`, `Owner`.

### Step 2: Multi-Branch & Warehouse Setup

- **What to do:** Register Central Warehouse ( `wh-1` ), physical showrooms, and branch transit hubs.
- **Menu to use:** `মাল্টি-ওয়ারহাউজ ও শোরুম (WarehousesView)` → *নতুন ওয়ারহাউজ যোগ করুন*.
- **Mandatory fields:** Code ( `CWH`, `DH-01` ), Name, Type ( `Central Hub` / `Branch Showroom` ), Manager Name, Mobile Number.
- **What happens after saving:** Stock and IMEI balances become segmented by location; enables branch-to-branch transfers.
- **Authorized Roles:** `Super Admin`, `Owner`, `General Manager`.

### Step 3: User Accounts & 9-Tier RBAC Setup

- **What to do:** Create individual user logins for staff members with dedicated phone, email, and designated role.
- **Menu to use:** `সেটিংস ও ব্যাকআপ হাব (SettingsView)` → *ইউজার ম্যানেজমেন্ট ও রোল পারমিশন*.
- **Mandatory fields:** Full Name, Email, Password, Assigned Role (e.g. `Cashier`, `Salesman`, `Accountant`).
- **Security Rule:** Never share passwords. Default role for field officers is strictly `Salesman`.
- **Authorized Roles:** `Super Admin`.

### Step 4: Brand Master & Incentive Scheme Definition

- **What to do:** Define smartphone brands (Samsung, Xiaomi, Vivo, Apple) and official warranty policies.
- **Menu to use:** `ব্র্যান্ড ও অথরাইজেশন (BrandsView)`.
- **Authorized Roles:** `Warehouse Manager`, `General Manager`, `Super Admin`.

### Step 5: Supplier Master Setup

- **What to do:** Register official national distributors (e.g., Fair Electronics Ltd, Xiaomi Distribution BD).
- **Menu to use:** `সাপ্লায়ার লেজার ও পেয়াবল (SuppliersView)` → *নতুন সাপ্লায়ার যোগ করুন*.
- **Mandatory fields:** Supplier Name, Company Name, Mobile Number, Payment Terms Days, Opening Due.
- **Authorized Roles:** `Accounts Manager`, `Purchase Manager`, `Super Admin`.

### Step 6: Dealer / Customer Master Setup

- **What to do:** Register wholesale dealers, retail partners, and corporate accounts.
- **Menu to use:** `ডিলার ও রিটেইলার লেজার (CustomersView)` → *নতুন কাস্টমার / ডিলার যোগ করুন*.
- **Mandatory fields:** Shop Name, Owner Name, Mobile Number, District, Customer Type ( `Wholesale Dealer` / `Retail Customer` ), Credit Limit ( `ট` ), Allowed Due Days (e.g., 15 days).
- **What to verify:** Ensure credit limit is set strictly based on physical security cheques or bank guarantees.
- **Authorized Roles:** `Sales Manager`, `Accounts Manager`, `Super Admin`.

### Step 7: Product Catalog & Variant Configuration

- **What to do:** Create handset models (e.g., Samsung Galaxy S24 Ultra) with exact memory/color variants (12GB/256GB Titanium Black).
- **Menu to use:** `স্টক ব্যালেন্স ও ভ্যারিয়েশন (InventoryView)` → *+ নতুন প্রোডাক্ট / মডেল*.

- **Mandatory fields:** Model Name, Brand, Category ( **Smartphone** , **Feature Phone** , **Tablet** , **Accessories** ), Variant Description, BTRC Approval Status, Warranty Months.
- **Authorized Roles:** **Warehouse Manager** , **Super Admin** .

### Step 8: Purchase Order Entry & Inward IMEI Scanning

- **What to do:** Receive supplier consignment, enter invoice details, transport costs, and scan all 15-digit IMEIs.
- **Menu to use:** **সাপ্লায়ার পারচেজ বিল (PurchaseView)** → + **Purchase Bill** (or Top Header **+ Purchase** ).
- **Mandatory fields:** Supplier, Warehouse, Purchase Date, Model, Unit Cost ( **ট** ), Scanned IMEIs list.
- **Validation:** System enforces exact equality: **Quantity = Scanned IMEIs count** . Rejects duplicate IMEIs.
- **What happens after saving:**
  1. Creates Purchase Invoice record ( **PINV-2026-xxxx** ).
  2. Creates individual records in **imeis** table with status **In Stock** .
  3. Increments supplier payable due and records inventory asset value.
- **Authorized Roles:** **Warehouse Manager** , **General Manager** , **Super Admin** .

### Step 9: Barcode & Label Generation

- **What to do:** Print thermal box labels containing Model, Color, Storage, IMEI 1 Barcode, IMEI 2 Barcode, MRP, and BTRC logo.
- **Menu to use:** **বারকোড ও বক্স স্টিকার (BarcodeLabelView)** .
- **Print Options:** Direct ESC/POS Web-Bluetooth/Web-Serial or browser PDF layout.
- **Authorized Roles:** **Warehouse Manager** .

### Step 10: Inter-Branch Stock Transfer (If multi-outlet)

- **What to do:** Transfer stock from Central Warehouse to Branch Outlets.
- **Menu to use:** **ইন্টার-ওয়্যারহাউজ ট্রান্সফার (StockTransfersView)** → *নতুন ষ্টক ট্রান্সফার*.
- **Workflow:** Select Source Warehouse → Destination Warehouse → Scan IMEIs → Dispatch.
- **Status cycle:** **Pending** → **Dispatched** → **Received** . IMEIs update their **warehouseId** upon destination receipt.
- **Authorized Roles:** **Warehouse Manager** .

### Step 11: POS & Wholesale Sales Invoicing

- **What to do:** Execute dealer sale or retail express counter transaction.
- **Menu to use:** **পাইকারি সেলস ও ইনভয়েস (WholesaleSalesView)** or **রিটেইল পিওএস কাউন্টার (RetailPOSView)** .
- **Workflow:**
  1. Select Customer/Dealer. System immediately inspects **creditLimit** and **currentDue** .
  2. Scan handset IMEI using Multi-Barcode Scanner ( **Ctrl+B** ) or type-ahead.
  3. Apply trade discounts. (If discount exceeds **maxDiscountWithoutApproval** , manager override is enforced).
  4. Select Payment Method ( **Cash** , **Bank Transfer** , **Cheque** , **bKash** , **Mixed** ).
  5. Enter Paid Amount. Remaining balance is automatically posted as **dueAmount** .
  6. Finalize Sale & Print Invoice ( **SAL-2026-xxxx** ).
- **What happens after saving:**
  1. Handset IMEI status switches from **In Stock** to **Sold** .
  2. Customer **currentDue** increases by invoice due amount.
  3. Cash Book or Bank Account balance increases by **paidAmount** .
  4. Salesman commission is accumulated.
  5. Accounts Receivable ledger is updated.
- **Authorized Roles:** **Salesman** , **Cashier** , **Sales Manager** , **Super Admin** .

### Step 12: Delivery Challan & Logistics Dispatch

- **What to do:** Generate 3-part delivery challan and dispatch via courier (Steadfast/Sundarban) or delivery van.
- **Menu to use:** **ডেলিভারি চালান ও কুরিয়ার (DeliveryDispatchView)** .
- **Authorized Roles:** **Warehouse Manager** , **Sales Manager** .

### Step 13: Due Collection & Money Receipt Hub

- **What to do:** Collect outstanding dues from dealers via Cash, Bank Transfer, or Cheque.
- **Menu to use:** **বকেয়া কালেকশন ও রসিদ (DueCollectionView)** → + *নতুন মানি রসিদ*.

- **Mandatory fields:** Customer, Collection Amount, Payment Method, Collector Salesman, Reference Invoice.
- **What happens after saving:**
  1. Issues Money Receipt ( **MR-2026-xxxx** ).
  2. Deducts Customer's **currentDue** immediately.
  3. Debits Cash in Hand or Bank Account.
  4. Logs collector salesman collection quota.
- **Authorized Roles:** **Cashier** , **Accounts Manager** , **Sales Manager** , **Super Admin** .

#### Step 14: Customer Return & Warranty RMA

- **What to do:** Process handset return (within return window) or submit device for official brand warranty replacement.
- **Menu to use:** **কাস্টমার ও ভেন্ডর রিটার্ন (ReturnsView)** or **ওয়ারেন্টি ও সার্ভিস কেয়ার (WarrantyServiceView)** .
- **Authorized Roles:** **Warehouse Manager** , **General Manager** .

#### Step 15: Operational Expense Entry

- **What to do:** Record office rent, showroom electricity bill, salesman travel allowance, and tea/entertainment petty cash.
- **Menu to use:** **অফিস ও অপারেশন খরচ (ExpensesView)** → + **নতুন খরচ ভাউচার**.
- **Mandatory fields:** Date, Category, Amount, Payment Source ( **Cash Book** or **Bank Account** ), Recipient, Approved By.
- **Authorized Roles:** **Cashier** , **Accountant** , **Accounts Manager** .

#### Step 16: Daily Cash Reconciliation & Vault Day Closing

- **What to do:** End-of-day mandatory physical cash count and vault lock.
- **Menu to use:** **দৈনিক ডে ক্লোজিং ও ভল্ট (DayClosingView)** .
- **Workflow:**
  1. System displays **Expected Cash in Hand** = **Opening Cash** + **Cash Sales** + **Cash Due Collections** - **Cash Expenses** - **Cash Bank Deposits** .
  2. Cashier inputs physical denomination breakdown (₳1000 x N, ₳500 x N, etc.).
  3. Discrepancy ( **Actual - Expected** ) is computed.
  4. Day is locked. Generates **DAY-CLOSE-YYYY-MM-DD** .
- **Authorized Roles:** **Cashier** (initiates), **Accounts Manager** or **General Manager** (verifies).

## Section B: New User & First-Time Setup Guide

Before recording any commercial transaction, complete the following sequential setup checklist:

| Priority | Setup Item                        | Module / View            | Prerequisites        | Mandatory Verification                                                                             |
|----------|-----------------------------------|--------------------------|----------------------|----------------------------------------------------------------------------------------------------|
| 1        | System Settings & Company Profile | Settings & Backup Hub    | None                 | Company Legal Name, BIN/VAT Number, Currency ( <b>BDT</b> ), Valuation ( <b>FIFO</b> )             |
| 2        | Chart of Accounts (COA)           | General Ledger & COA     | None                 | Ensure Assets (1000s), Liabilities (2000s), Equity (3000s), Income (4000s), Expenses (5000s) exist |
| 3        | Bank Accounts Registration        | Cash Book & Multi-Bank   | COA                  | Account Numbers, Branch Name, Opening Balance for DBBL, BRAC, City Bank, bKash Merchant            |
| 4        | Multi-Warehouse / Outlets         | Multi-Hub & Outlets      | Company Setup        | Create at least 1 Central Warehouse ( <b>wh-1</b> ) and 1 Main Retail Counter                      |
| 5        | Staff & RBAC Accounts             | Settings & Backup Hub    | None                 | Create user profiles for Owner, GM, Accounts, Sales, and Warehouse staff                           |
| 6        | Brands & Categories               | Brand Master & OEM       | None                 | Register Samsung, Xiaomi, Vivo, Realme, Apple, Transsion                                           |
| 7        | Expense Categories                | Expense Vouchers         | COA                  | Rent, Courier, TA/DA, Utilities, Marketing, Entertainment                                          |
| 8        | Suppliers Master Data             | Suppliers & Payables     | None                 | Register Authorized Importers with their Opening Payable balances                                  |
| 9        | Dealers / Customers Master        | Dealer Management        | Salesmen             | Register Dealers with Phone, Shop Address, Credit Limits, and Opening Dues                         |
| 10       | Sales Officers (Salesmen)         | Sales Officers & Comm.   | None                 | Register Field Officers with Monthly Target, Commission %, and Assigned Route                      |
| 11       | Products & Variants Catalog       | Stock & Serial Valuation | Brands               | Create Handset Models and color/storage variants (Do not enter IMEIs here)                         |
| 12       | Opening Inventory & IMEI Inward   | Purchase Orders & Bills  | Products, Warehouses | Enter Opening Stock as Purchase Bill # <b>OP-STOCK-2026</b> with full IMEI barcode scans           |
| 13       | Initial Cash Vault Opening        | Daily Cash Vault Closing | Bank Accounts        | Confirm Day 1 Physical Cash Vault Balance                                                          |

 **জরুরি সতর্কতা (CRITICAL):**  
**Setup Freeze Rule:** Steps 1 through 12 **MUST** be completed before issuing the first sales invoice. Attempting to sell without registered IMEIs or credit limits causes operational deadlocks.

Section C: Daily Operation Guide

Morning Routine (08:30 AM – 10:00 AM)

1. **Login & Cockpit Review:** Open **অপারেশনাল ড্যাশবোর্ড (DashboardView)** . Inspect Real-Time Gross Revenue, Stock Alert badges, and Overdue Credit Alerts.
2. **Alert Center Inspection:** Open **অ্যালার্ট ও রিয়েলটাইম মনিটর (AlertCenterView)** . Review low-stock handsets, supplier payment due dates, and pending customer return approvals.
3. **Vault Opening Verification:** Open **ক্যাশ বুক ও ব্যাংক ব্যালেন্স (CashBankView)** . Verify that yesterday's closing cash matches today's physical opening cash in the counter drawer.
4. **Pending Consignments & Transfers:** Open **ইন্টার-ওয়্যারহাউজ ট্রান্সফার (StockTransfersView)** . Acknowledge and verify any stock dispatched from central warehouse overnight.

Business Hours Operations (10:00 AM – 07:00 PM)

1. **Consignment Inward:** Scan all new supplier shipments immediately using **+ Purchase** modal. Never place unscanned handset boxes on retail shelves.
2. **Express POS & Wholesale Sales:** Scan IMEI barcodes for every device sold. Print customer warranty receipts.
3. **Due Collection:** Record every cash/bKash/cheque collection through **Due Collection & Receipts** modal immediately. Hand the printed money receipt to the dealer or field officer.
4. **Petty Cash Expenses:** Voucher every expense as it occurs. Obtain supervisor signature.

Evening Closing Routine (07:00 PM – 09:00 PM)

1. **Daily Returns Reversal Check:** Ensure all RMA returns processed during the day have replacement IMEIs or Credit Notes allocated.
2. **Sales vs. Bank Settlement:** Reconcile online bKash merchant receipts and card POS settlement slips against bank statements.
3. **Physical Drawer Cash Count:** Cashier counts notes by denomination.

4. **Day Closing Execution:** Open **দৈনিক ডে ক্লোজিং ও ভল্ট (DayClosingView)**. Input denomination counts, verify discrepancy is **৳০.০০**, and click **"আজকের ডে ক্লোজিং সম্পন্ন ও লক করুন"**.
5. **Nightly Cloud Backup:** Check header cloud sync icon. Verify **Pending Changes: 0**. Run manual cloud sync if required.

## Section D: Purchase & Stock Entry Guide

### Handset Inward Workflow (IMEI-Based Devices)

1. Open **সাপ্লায়ার পারচেজ বিল (PurchaseView)** → Click **+ Purchase Bill**.
2. Select **Supplier Name**, **Destination Warehouse**, and **Purchase Date**.
3. Choose the **Product Model** and **Variant**.
4. In the **IMEI Scanning Box**, scan all 15-digit IMEIs using a 2D barcode scanner (or paste comma/newline separated IMEIs from the distributor's electronic packing list).
5. **Automated Validation Rules:**
  - Each IMEI must be exactly 15 digits numeric (standard GSMA format).
  - System scans **imeis** database table across all warehouses. If any IMEI is already registered ( **In Stock** or **Sold** ), it triggers a **CRITICAL DUPLICATE ERROR** and blocks invoice creation.
  - **Quantity** input is strictly locked to match the number of scanned IMEIs.
6. Enter **Unit Purchase Cost (b)**, **Trade Discount**, and any **Transport Cost (b)**.
7. Enter **Paid Amount** and select payment method ( **Bank Transfer** / **Cheque** / **Due** ).
8. Click **"পারচেজ বিল সংরক্ষণ করুন"**.

### Non-IMEI Accessories & Spare Parts

- For items like chargers, cables, earbuds, and protective cases, select Category = **Accessories**.
- System disables mandatory 15-digit serial validation, allowing batch barcode tracking (EAN-13) and pure quantity-based stock counting.

### Purchase Return Workflow (Vendor RMA)

1. Navigate to **কাস্টমার ও ভেন্ডর রিটার্ন (ReturnsView)** → Tab **সাপ্লায়ার রিটার্ন**.
2. Select Supplier and original purchase invoice.
3. Scan the defective handset IMEI. System verifies that the IMEI was originally supplied by this specific vendor.
4. Select Return Reason ( **DOA Defective**, **Display Line Defect**, **Carton Damaged** ).
5. Choose Action: **Supplier Credit Note** or **Bank Refund**.
6. Upon saving, the IMEI status transitions from **In Stock** to **Supplier Return**, inventory asset value is credited, and Supplier Payable due is reduced.

## Section E: Professional POS & Wholesale Sales Guide

### 1. Wholesale Sales Workflow ( **WholesaleSalesView** )

- **Step 1:** Select **Customer (Dealer)**. The system dynamically displays Dealer Credit Profile:
  - Credit Limit: e.g. ৳5,00,000
  - Current Due: e.g. ৳3,40,000
  - Available Credit: ৳1,60,000
  - Overdue Invoices: Count and days overdue.
- **Hard Credit Lock:** If **Current Due + Order Subtotal > Credit Limit** and **creditLimitHardBlock** is enabled in Settings, the invoice creation is **HARD BLOCKED**. Only an authorized **Super Admin** or **Owner** can temporarily raise the dealer's limit.
- **Step 2:** Select **Assigned Salesman**. Tracks sales targets and commission.
- **Step 3:** Scan Handset IMEIs. System verifies each device is **In Stock** in the selected warehouse.
- **Step 4:** Set Discount. If discount exceeds ৳1,000 per handset, supervisor approval prompt is triggered.
- **Step 5:** Record Payment ( **Cash**, **Bank**, or **Unpaid Wholesale Due** ).
- **Step 6:** Save and Print 3-Copy Thermal or A4 Invoice.

### 2. Retail Express Counter POS ( **RetailPOSView** )

- Designed for fast-paced walk-in retail customers.

- Supports barcode hotkey scanning ( **Ctrl+B** ), quick customer mobile registration, split payment (e.g. ₳30,000 Cash + ₳45,000 bKash), and instant thermal receipt printing with warranty QR code.

### 3. EMI & Hire-Purchase Sales ( **EMIInstallmentView** )

- Used for customer smartphone financing:
  - Down Payment: 20% to 50%
  - Tenure: 3, 6, 9, 12 months
  - Flat Interest: 0% (Zero-EMI promo) or 5-10%
  - Mandatory Guarantor NID, phone, and Security Cheque details.
- Handset is marked as **Sold (EMI)** . Monthly installments generate automated payment schedules and SMS reminder triggers.

## Section F: Customer & Due Management

### Complete Credit Lifecycle

### Due Collection & Money Receipt Hub ( **DueCollectionView** )

1. Click + **নতুন মানি রসিদ (New Money Receipt)**.
2. Select Customer. System loads all unpaid invoices in chronological order (FIFO allocation).
3. Input Collection Amount (e.g., ₳1,00,000).
4. If a prompt cash payment waiver is negotiated, enter **Discount Waiver (৳)** (e.g., ₳2,000).
5. Select Payment Mode:
  - **Cash:** Directly debits Cash Drawer.
  - **Bank Transfer:** Select Bank Account, enter Transfer Reference / Transaction ID.
  - **Cheque:** Enter Bank Name, Cheque Number, Maturity Date.
6. Select Collection Salesman.
7. Click "মানি রসিদ নিশ্চিত করুন".
8. **Automated Impact:**
  - Customer due drops by **Amount + Discount Waiver** .
  - Cash / Bank account balance increments.
  - Money Receipt ( **MR-2026-xxxx** ) is generated and locked.
  - SMS confirmation is automatically transmitted to Dealer's mobile.

### Voiding / Correcting a Money Receipt

- Direct deletion of finalized financial receipts is **strictly forbidden**.
- To void an erroneous receipt, click "**রসিদ বাতিল (Void)**". Input mandatory reason.
- System reverses the customer due deduction, rolls back the cash/bank entry, logs an immutable audit trail entry, and marks receipt status as **Voided** .

## Section G: Branch & Stock Transfer Guide

### Inter-Warehouse Transfer Protocol ( **StockTransfersView** )

1. **Initiate Transfer:** Click + **নতুন ষ্টক ট্রান্সফার**.
2. Select **Source Warehouse** (e.g., Central Motijheel Hub) and **Destination Warehouse** (e.g., Chittagong Agrabad Outlet).
3. Scan IMEI to be transferred.
4. Input Transport / Courier Name and Driver / Consignment Number.

5. Click "ট্রান্সফার ইস্যু ও ডিসপ্যাচ".
6. **In-Transit State:** Handset IMEI is marked as **Transferred** with transit flag. Neither source nor destination can sell the device while in transit.
7. **Destination Verification & Receipt:**
  - Destination branch manager opens **StockTransfersView**.
  - Physically inspects box seals and scans every arrived IMEI.
  - If all IMEIs match: clicks "পণ্য রিসিভ নিশ্চিত করুন".
  - Status updates to **Received**. IMEIs update their **warehouseId** to the destination branch and status becomes **In Stock**.
8. **Handling Discrepancies (Lost or Damaged in Transit):**
  - If a scanned IMEI is missing from the carton, destination manager rejects that specific IMEI line.
  - Discrepancy report is sent to the General Manager. Transit insurance claim or courier dispute is initiated.

## Section H: Return & Adjustment Procedures

### 1. Customer Sales Return

- **When allowed:** Within 7 days of invoice date, carton sealed or DOA defect confirmed.
- **Menu:** **কাস্টমার ও ভেন্ডর রিটার্ন** (ReturnsView) → + **কাস্টমার রিটার্ন**.
- **Workflow:** Select Dealer/Customer → Enter Original Invoice No → Scan IMEI → Verify Handset Condition ( **Sealed** / **Open Box** / **Damaged** ) → Select Action ( **Credit Note Balance** or **Cash Refund** ).
- **System Action:** Handset IMEI returns to **In Stock** (or **Damaged Stock**), dealer receivable due is decreased, and salesman commission is automatically reversed.

### 2. Stock Adjustment (Physical Audit Discrepancies)

- In case of physical damage, showroom glass breakage, or transit loss:
  - Never delete the product record.
  - Update IMEI status to **Damaged** or **Lost/Blocked**.
  - Create Journal Entry: Debit **5080 - Inventory Loss / Damaged Goods Expense**, Credit **1040 - Merchandise Inventory Asset**.

## Section I: Cash & Financial Management

### Daily Financial Flow Matrix

```

[Opening Cash in Drawer]
+ Cash Sales (Retail POS & Wholesale)
+ Cash Due Collections from Dealers
- Cash Expenses (Office & Logistics)
- Cash Deposits to Commercial Banks
-----
= Expected Closing Cash
vs Physical Drawer Cash Count
-----
= Discrepancy (৳0.00 Target)
  
```

### Daily Vault Closing Protocol ( **DayClosingView** )

1. At the conclusion of daily trading, Cashier opens **DayClosingView**.
2. System calculates **Expected Cash** from real-time transaction ledgers.
3. Cashier inputs physical currency note count:
  - ৳1000 notes x Count
  - ৳500 notes x Count
  - ৳200 notes x Count
  - ৳100 notes x Count
  - ৳50 / ৳20 / ৳10 coins & notes x Count
4. **Discrepancy Resolution:**
  - **Exact Match (৳0.00):** Manager approves and clicks "লক করুন".
  - **Cash Shortage (-৳):** Cashier must explain cause in notes. Shortage is debited to Cashier Advance / Suspense account until reconciled.
  - **Cash Excess (+৳):** Excess is temporarily posted to Miscellaneous Operating Income pending audit.

## Section J: Inventory Management & IMEI Audit

### Stock Control Cycle

- **Daily:** High-value flagship models (iPhone Pro Max, Galaxy S Ultra) physical carton spot-check.
- **Weekly:** Multi-Warehouse Stock Transfer audit and pending RMA device counts.
- **Monthly:** 100% Comprehensive Wall-to-Wall IMEI Barcode Scanning Reconciliation.

### Wall-to-Wall IMEI Reconciliation Procedure

1. Open **মাল্টি-স্ক্যানার ইঞ্জিন (Multi-Scanner Modal - Ctrl+B)**.
2. Physical inventory team scans every handset box in the showroom vault.
3. System compares scanned IMEIs against database **In Stock** list for that warehouse.
4. Generates instant 3-way variance report:
  - **Matched Devices:** In System & Physically Present.
  - **Ghost Stock (Missing):** In System but NOT Scanned Physically (Investigate immediate theft/shrinkage).
  - **Unrecorded Stock:** Scanned Physically but NOT In System (Investigate unposted purchase bill or cancelled sale).

## Section K: Reports & Management Review

### Daily Operational Reports

- **Daily Sales & Collection Summary:** Total turnover, cash realized, credit extended, gross margin.
- **Cash Vault Closing Sheet:** Physical cash reconciliation and bank deposits.
- **Day-End Stock Ledger:** Units sold vs. opening vs. closing inventory.

### Weekly Tactical Reviews

- **Dealer Due Ageing Report ( **DueAgeingView** ):** Categorizes dealer balances into **0-15 Days** (Current), **16-30 Days** (Due Warning), **31-60 Days** (Critical Block), and **60+ Days** (Legal Recovery).
- **Brand Target Achievement Tracking ( **BrandIncentivesView** ):** Tracks units sold against quarterly brand slabs (Samsung, Xiaomi) to ensure maximum volume rebate bonuses are earned.
- **Salesman Performance & Route Productivity ( **SalesmenView** ):** Compares individual salesman sales achievements against monthly target quotas.

### Monthly Executive Review

- **Comprehensive P&L Statement ( **DynamicBusinessReportView** ):**
  - Gross Turnover
  - Cost of Goods Sold (COGS calculated via FIFO)
  - Gross Profit
  - Operational Overheads (Rent, Salaries, Logistics, Interest)
  - Net Operating Profit
- **Price Drop Rebate Claims ( **PriceDropClaimView** ):** Calculates distributor price drop protection claims due from smartphone brands for stock held during official OEM price revisions.

Section L: Role-Based Operational Guide (9 Roles)

| Module / Operation          | Super Admin / Owner | General Manager | Sales Manager | Warehouse Manager | Accounts Manager | Accountant | Cashier   | Salesman   |
|-----------------------------|---------------------|-----------------|---------------|-------------------|------------------|------------|-----------|------------|
| System Settings & Reset Hub | Full                | View Only       | Blocked       | Blocked           | Blocked          | Blocked    | Blocked   | Blocked    |
| User & Role Management      | Full                | View Only       | Blocked       | Blocked           | Blocked          | Blocked    | Blocked   | Blocked    |
| Purchase Inward & Bills     | Full                | Full            | View Only     | Full              | View Only        | View Only  | Blocked   | Blocked    |
| Inventory & IMEI Master     | Full                | Full            | View Only     | Full              | View Only        | View Only  | View Only | View (Own) |
| Wholesale Invoicing         | Full                | Full            | Full          | View Only         | View Only        | View Only  | Full      | Full       |
| Retail POS Counter          | Full                | Full            | Full          | View Only         | View Only        | View Only  | Full      | Blocked    |
| Stock Transfer Dispatch     | Full                | Full            | Blocked       | Full              | Blocked          | Blocked    | Blocked   | Blocked    |
| Stock Transfer Receive      | Full                | Full            | Blocked       | Full              | Blocked          | Blocked    | Blocked   | Blocked    |
| Due Collection & Receipts   | Full                | Full            | Full          | Blocked           | Full             | Full       | Full      | Full       |
| Cash Book & Bank Reconcile  | Full                | Full            | Blocked       | Blocked           | Full             | Full       | View Only | Blocked    |
| Daily Vault Day Closing     | Full                | Approve         | Blocked       | Blocked           | Approve          | Verify     | Execute   | Blocked    |
| Expenses Entry & Approval   | Full                | Approve         | Blocked       | Blocked           | Full             | Enter      | Enter     | Blocked    |
| Customer Returns (RMA)      | Full                | Approve         | Approve       | Full              | View Only        | View Only  | Blocked   | Blocked    |
| P&L & Financial Reports     | Full                | Full            | Sales Only    | Stock Only        | Full             | Full       | Blocked   | Blocked    |

Section M: Strict Enterprise Operational Rules

- 1. Zero Credential Sharing:** Staff members must never share login passwords. Every invoice, receipt, and stock movement is permanently branded with the active user's ID in the immutable audit log.
- 2. Never Sell Unscanned Devices:** Handing a mobile box to a customer without scanning its IMEI through the POS terminal is strictly prohibited.
- 3. No Direct Database Editing:** Transaction mistakes must be resolved via approved Credit Notes, Void Vouchers, or Reversal workflows. Never attempt to manually manipulate database records.
- 4. Mandatory Day Closing:** The cash drawer must be closed and locked every evening. Leaving day closings open across multiple calendar dates corrupts cash accounting ledgers.
- 5. Physical Vault Parity:** Physical cash in the drawer must exactly match the system's calculated balance. Cash shortages must be reported and investigated immediately.
- 6. Hard Credit Enforcement:** Salesmen are not authorized to override dealer credit limits. Credit exceptions require written authorization from the Business Owner or General Manager.

Section N: Error Prevention & Live Troubleshooting Matrix

| Problem / Error                 | Root Cause                                                                  | Corrective Action                                                                                    | Required Permission                      | Expected Result                                     |
|---------------------------------|-----------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------|------------------------------------------|-----------------------------------------------------|
| "IMEI already exists in system" | Handset was already entered in a previous purchase bill or returned.        | Use <b>IMEI 360° Tracker</b> to view device history. If returned to supplier, verify invoice number. | <b>Warehouse Manager</b>                 | Prevents duplicate stock entry and ghost inventory. |
| "IMEI status is 'Sold'"         | Attempting to sell an IMEI that was already invoiced to another customer.   | Check IMEI Tracker to see which invoice sold the device. Verify if box was swapped physically.       | <b>Sales Manager</b>                     | Eliminates selling the same device twice.           |
| "Credit limit exceeded"         | Dealer's outstanding balance plus current invoice exceeds authorized limit. | Collect pending dues via Money Receipt first, or request temporary credit ceiling extension.         | <b>Accounts Manager / Owner</b>          | Protects working capital from bad debt exposure.    |
| "Negative stock not allowed"    | Attempting to bill accessories with zero system balance.                    | Enter inward purchase bill or stock transfer before finalizing customer sale.                        | <b>Warehouse Manager</b>                 | Maintains positive real-world stock integrity.      |
| "Day Closing Discrepancy"       | Physical cash counted does not equal expected system cash.                  | Review day's Expense vouchers, unrecorded cash due collections, and bank cash deposits.              | <b>Cashier Manager</b> & <b>Accounts</b> | Identifies missing vouchers before drawer lock.     |
| "Offline sync queue pending"    | Internet connection drop prevented Supabase cloud push.                     | Check top header cloud badge. Verify WiFi/Broadband. Click manual sync icon when online.             | Any User                                 | All offline changes sync safely without data loss.  |

Section O: Professional Manager's Daily Checklist

 **Morning Opening Checklist (08:30 AM – 09:30 AM)**

- ☐ Login with Manager credentials; verify top header displays **Online** status.
- ☐ Review Operations Cockpit: check overnight wholesale orders and pending dispatches.
- ☐ Inspect Cash Drawer: verify physical opening cash matches yesterday's Closing Vault balance.
- ☐ Review Alert Center: check dealer credit alerts and low-stock handset warnings.
- ☐ Inspect Inter-Branch Transfers: confirm arrival of consignments dispatched overnight.

 **Midday Trading Checklist (01:00 PM – 02:00 PM)**

- ☐ Monitor real-time gross sales vs. daily revenue targets.
- ☐ Audit trade discounts applied on POS terminals; ensure no unauthorized price slashing.
- ☐ Verify that all supplier consignments received during the morning are 100% scanned into stock.
- ☐ Review overdue dealer accounts; dispatch field officers for payment follow-ups.

 **Evening Closing Checklist (07:30 PM – 09:00 PM)**

- ☐ Ensure all delivery challans are acknowledged and courier consignment numbers recorded.
- ☐ Verify all petty cash expense vouchers have signed receipts attached.
- ☐ Supervise Cashier's physical cash count by denomination.
- ☐ Reconcile bKash Merchant and Card POS terminal settlement slips against bank entries.
- ☐ Execute Daily Vault Day Closing and lock transaction registers for the date.
- ☐ Review Daily Sales & Gross Profit Summary Report.
- ☐ Confirm top header cloud sync displays **0 Pending Changes**.

Section P: Built-In Interactive Help & Scanner Engine

- Multi-Barcode & IMEI Scanner ( **Ctrl+B** ):** Dedicated high-speed serial engine. Allows rapid continuous scanning of 100+ IMEIs with audible beep confirmation, duplicate rejection, and instant stock verification.

- **Global Command Palette ( `Ctrl+K` ):** Jump instantly to any of the 35 modules, search customer ledgers, look up invoice numbers, or trigger modals without touching the mouse.
- **Contextual Help Modals ( `Ctrl+?` ):** Pressing `Ctrl+?` anywhere inside the application opens immediate operational guidance and hotkey references.

## Section Q: Employee Training Curriculum ("Start Here")

New recruits must complete the following 13-stage training track in sequence:

1. Login & Operations Cockpit  
↓
2. System Settings & Policies  
↓
3. Brand, Category & Product Catalog  
↓
4. Supplier Purchase & Multi-IMEI Inward  
↓
5. Inventory Valuation & Barcode Labeling  
↓
6. POS Counter & Wholesale Sales Invoicing  
↓
7. Dealer Credit & Money Receipt Hub  
↓
8. Customer Returns & Warranty RMA  
↓
9. Branch-to-Branch Stock Transfers  
↓
10. Cash Book, Bank Ledgers & Expenses  
↓
11. Daily Vault Reconciliation & Day Closing  
↓
12. Dynamic Business Reports & Auditing  
↓
13. Executive P&L & Profitability Analysis

Upon completing each training module under the supervision of the General Manager, the employee is granted production credentials corresponding to their authorized RBAC role.
